## National Bike Month

Bicycles are human powered vehicles, typically featuring pedals, a seat, two wheels and a frame.

Although unicycles (one wheel) and tricycles (three wheels) don't have two wheels, they are sometimes still referred to as 'bikes'.

You may have heard of the Penny-farthing, an early type of bicycle that featured a front wheel significantly larger than the rear.

The name comes from the old British Penny and Farthing coins which represent the large and small wheels.
